## CERAMOSIDES™ Wheat Ceramide

- A new beauty secret - **patented** ingredient with **ultimate skin hydration effect**.
- Skin youth and hydration depend on key lipids called ceramides. As we age, we start losing ceramides, resulting in dry and itchy skin, pulling sensations and wrinkles.
- Taking phytoceramides orally helps restore the skin's ceramide content.
- Clinical trial using **30mg CERAMOSIDES™** showed outstanding significant results in **only 15 days**.<sup>1</sup>
  1. High skin moisturizing capacity<sup>1</sup>
  2. Anti-aging effect with reduced micro wrinkles and increased elasticity<sup>1</sup>
  3. Improves skin appearance with increased smoothness and reduced roughness<sup>1</sup>

## GliSODin® French Melon Extract

- GliSODin® is a patented and powerful active antioxidant ingredient that combines Superoxide Dismutase (SOD), derived from melons, with gliadin, which acts as a protective barrier and making SOD stable within the body.
- GliSODin® is the first orally effective form of SOD and works by promoting our own, innate cellular antioxidant defense system, providing therapeutic health benefits.
- SOD is one of the body's most powerful antioxidants.
- Clinically proven to:
  - Promote production of body's own natural antioxidants <sup>2</sup>
  - Protect cellular health from oxidative stress <sup>2</sup>
  - Support skin health by inhibiting UV stress in the sun-sensitive or photo-oxidative stress <sup>3,4</sup>
  - Support healthy immune function and defense system <sup>5</sup>

## GliSODin® The Pyramid of Antioxidants

### PRIMARY INTERNAL ANTIOXIDANTS

Complete the internal defense system

Unlike secondary dietary antioxidants, GliSODin® works as an **antioxidant catalyst**, promoting the production of the body's own primary internal antioxidants at the cellular level that complete the defense system.

### SECONDARY DIETARY ANTIOXIDANTS

Play a buffering role, but are rapidly saturated

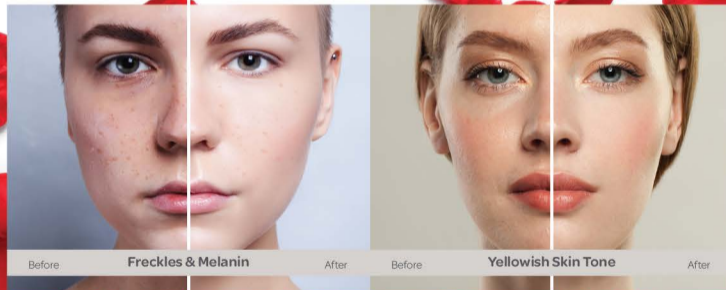

### Did You Know?

GliSODin® = Gliadin + SOD

GliSODin® provides a melon source of **SOD** and it is protected by **gliadin**, a wheat protein that guards SOD during digestion, making GliSODin® a completely vegetarian product.

## Rose Petal Extract

- Japan patented skin whitening supplement with proven melanin suppression (Patent No. 3818483).
- A potent antioxidant which protects skin from oxidative damages.
- Inhibits tyrosinase enzyme activity and reduces skin pigmentation and dark spots.<sup>6</sup>
- Skin returns to translucent white in 2 months!

## PhytoCellTec™ Md Nu Apple Stem Cell

- **PhytoCellTec™ Md Nu** is a **patented** liposomal preparation derived from the cultivated fruit cells of **Uttwiler Spätlauber**, a rare Swiss apple with exceptional storability and longevity potential.<sup>7</sup>
- **PhytoCellTec™** technology involves wounding a small quantity of **totipotent** plant cells to trigger the development of **callus** cells. This healing tissue composed of stem cells which is then collected and multiplied.<sup>7</sup>

- Slows skin aging by protecting essential skin stem cells and preserves the ability to form new epidermal tissues. Keeping the skin looking youthful longer, and giving it a better, more vital appearance.<sup>8</sup>
- **Restores skin elasticity**, giving your skin a boost of youthful rejuvenation!<sup>8</sup>
- **Protects stem cells against UV light**, combats premature aging and fine lines.<sup>8</sup>
- **Visible wrinkle reduction** in 28 days!<sup>9</sup>

### Did You Know?

A totipotent cell is a single cell that has the capacity to self-renew by multiplying and developing into a complete organism.

A callus cell is a soft tissue that forms over a wounded or cut plant surface, leading to healing.

As we age, the number of skin stem cells and vitality decrease, the skin epidermis takes longer to renew itself and wrinkles form.
